New Spaces and Designs for Cooking and Dining

SO GOOD, YOU COULD EAT IT!

**The Fantales Kitchen · YSG Studio ·
Melbourne, Australia**

The Fantales Kitchen was the result of an invitation by Australian manufacturer Laminex for YSG Studio to design a beautiful yet durable kitchen utilizing Laminex laminates. With the entire Laminex Color Collection at its disposal, YSG settled on a combination of solid-color laminates alongside classic woodgrains. Named after Fantales, a brand of chocolate-covered soft caramels beloved by many in Australia, the color scheme chosen by the studio is one of warm, velvety toffee browns. The primary task area consists of an L-shaped bench raised above a platform of glass mosaic tiles, set against a wall painted in a mottled, terra-cotta hue. The joinery is faced with laminate in “Burnt Ochre” and the countertop in “Moroccan Clay.” A beautifully sculpted kitchen island is finished in three contrasting woodgrain laminates and features a striking decorative band of alternating strips of dark and light. As a whole, the kitchen demonstrates how flexible the laminates are in creating sculptural shapes, curved outlines, and interlocking patterns that define the design.

To contrast with the predominantly brown and orange of their kitchen design, YSG Studio lined the drawers and cabinet interiors with Laminex's Fresh Spring—a laminate in summer-sky blue.
